## Technical Skills

- Operating System     **:** Windows XP- Windows 10
- Programming language     **:** C, C++
- Database     **:** MySQL
- Basic Knowledge Of     **:** MS PowerPoint, MS word, Oops
- Certification of Cloud Computing

## Training

- BSNL     **[ALMORA]**
- Cloud Computing     **[APTRON, NOIDA]**

### Aws project:- Deploy a Multi-tier website using EC2

**Description:** Amazon Elastic Compute Cloud (Amazon EC2) provides scalable computing capacity in the Amazon Web Services (AWS) cloud. Using Amazon EC2 eliminates your need to invest in hardware up front, so you can develop and deploy applications faster. You can use Amazon EC2 to launch as many or as few virtual servers as you need, configure security and networking, and manage storage. Amazon EC2 enables you to scale up or down to handle changes in requirements or spikes in popularity, reducing your need to forecast traffic.

**Problem Statement:**

Company wants to move their product to AWS. They have the following things setup right now:
1. MySQL DB
2. Website (PHP)
The company wants high availability on this product, therefore wants autoscaling to be enabled on this website.

# Hobbies & Interests

- Painting,Sketching
- Singing and Listening Music
